

This table illustrates frequency and percentage distribution of baseline data. The data findings are presented as follows:

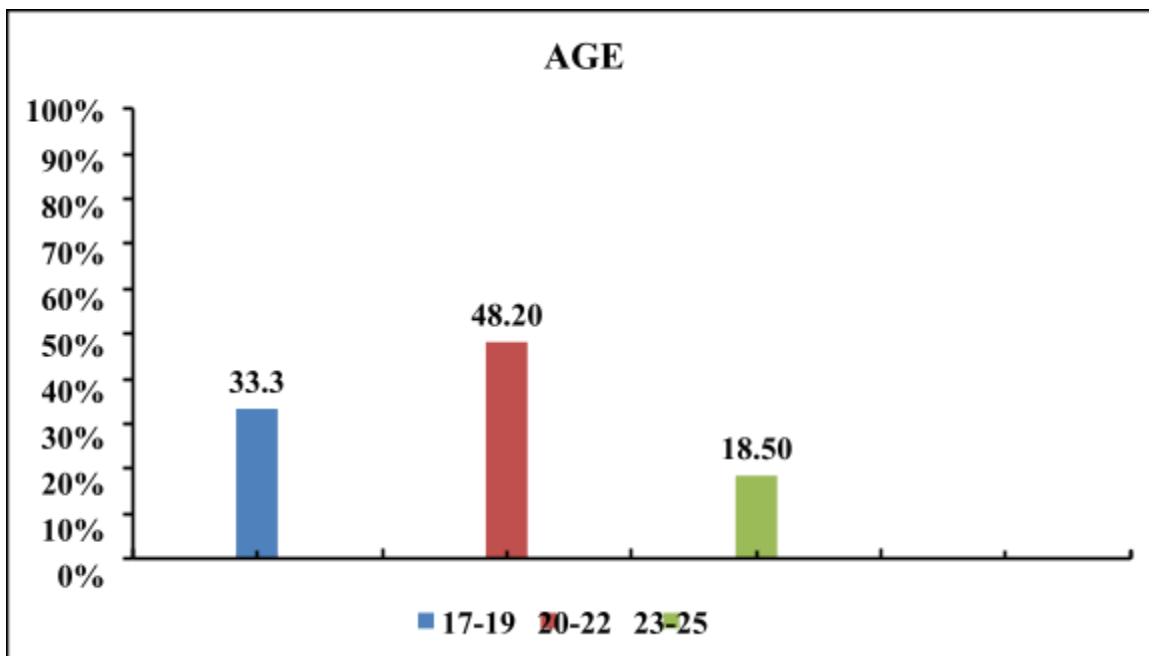

Fig1: Bar graph represents the percentage distribution of student's age

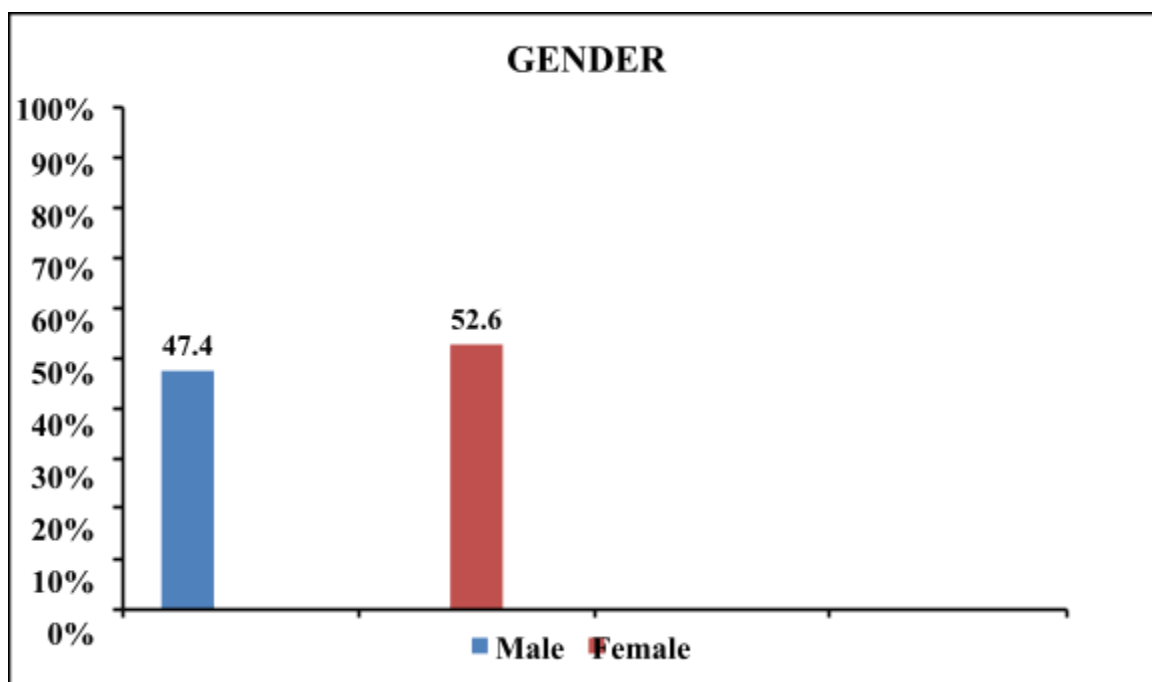

Fig 2: It depicts the percentage distribution of student's gender

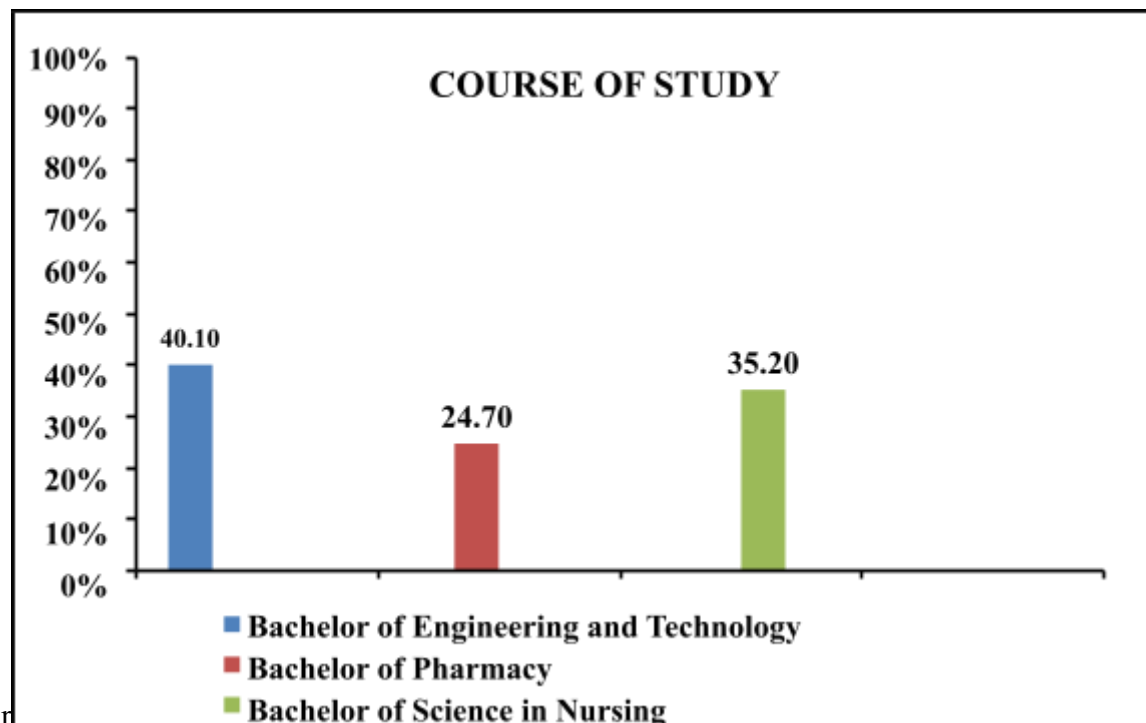

Fig 3: It shows the percentage distribution of student based on course of study

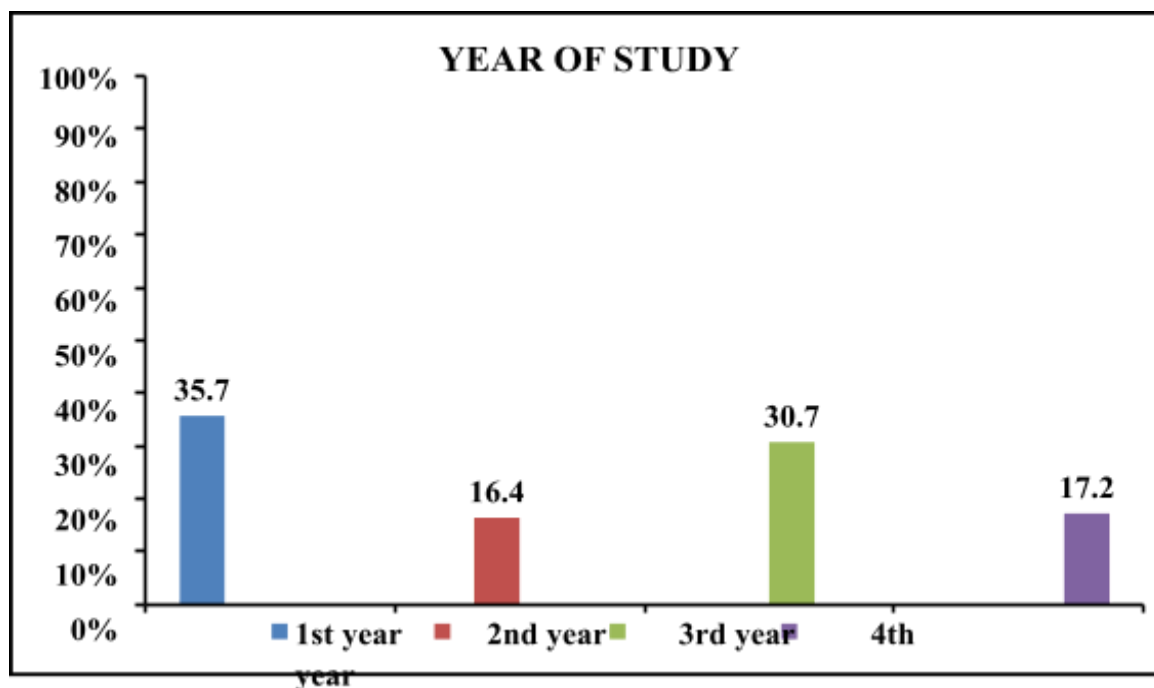

Fig 4: It illustrates the percentage distribution based on academic year

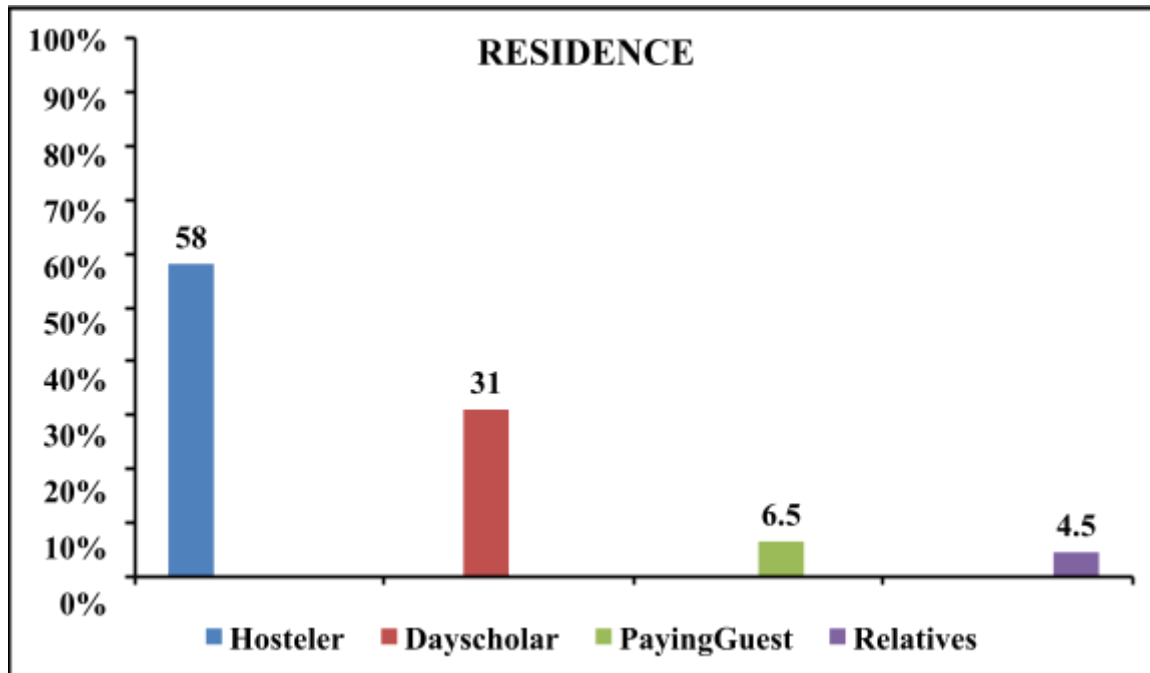

Fig 5: It illustrates percentage distribution of student's residence

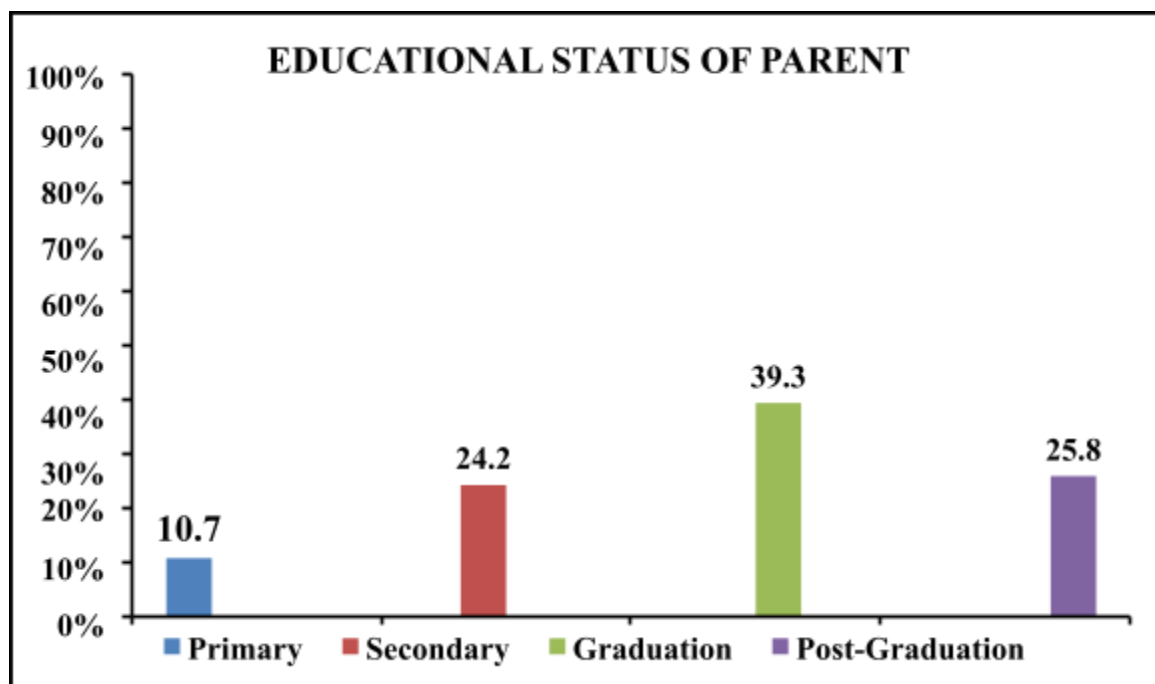

Fig 6: It depicts percentage distribution of educational status of parent

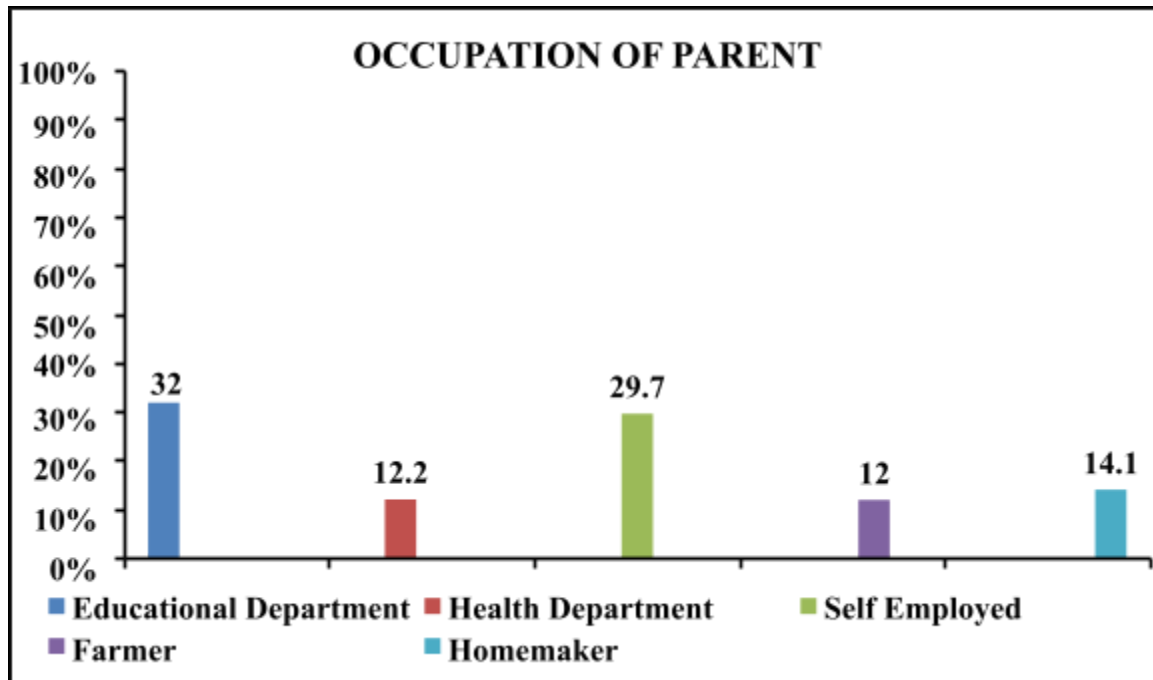

Fig7: It shows percentage distribution of occupation of parents

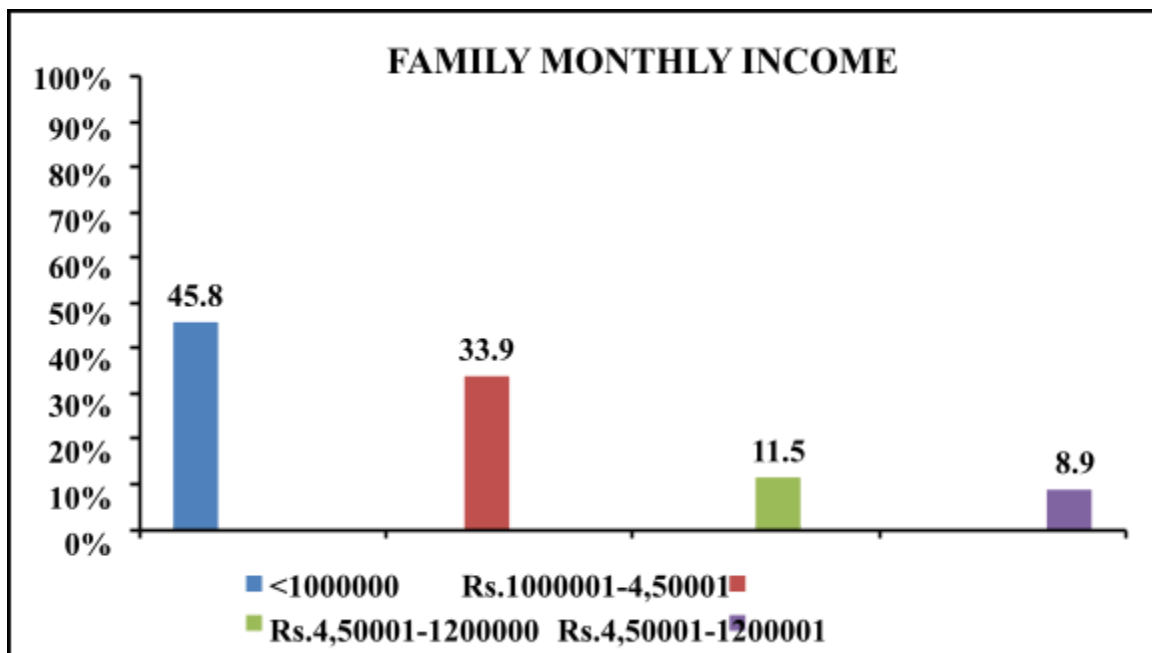

Fig 8: It shows percentage distribution based on family monthly income

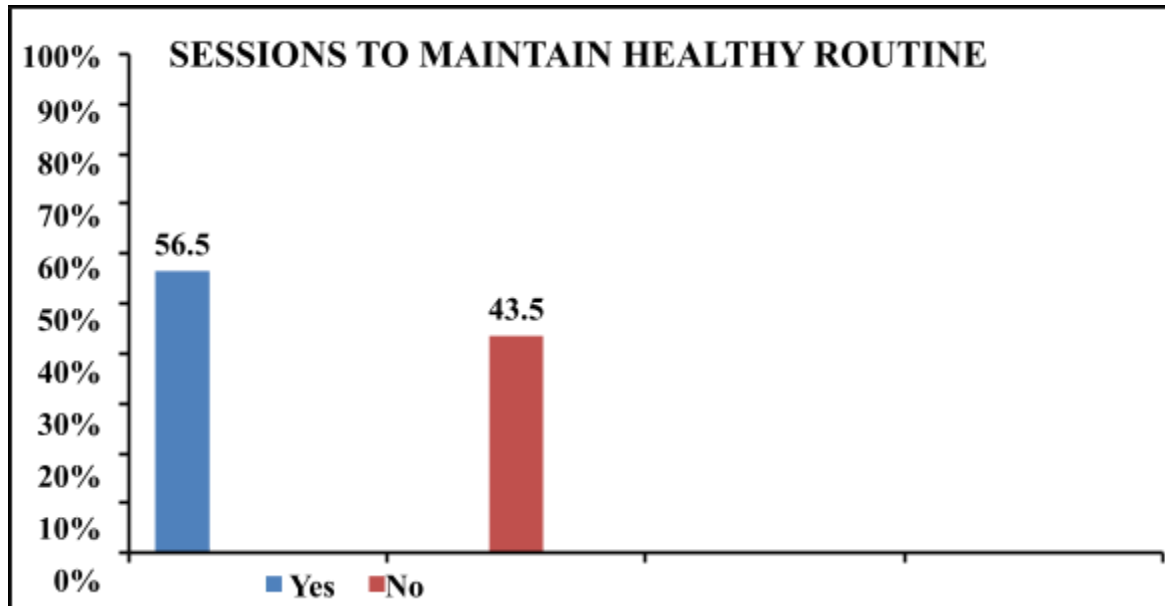

Fig 9: Illustrate the percentage distribution regarding session attended to maintain healthy routines.

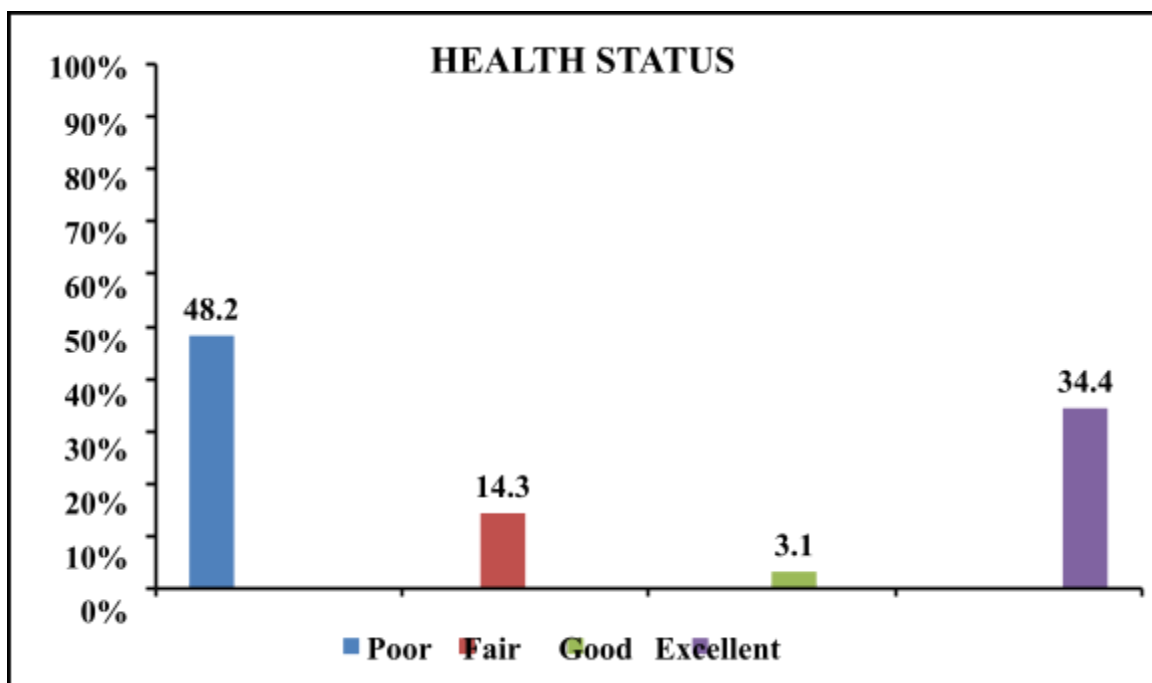

Fig 10: Depicts the percentage distribution based on health status

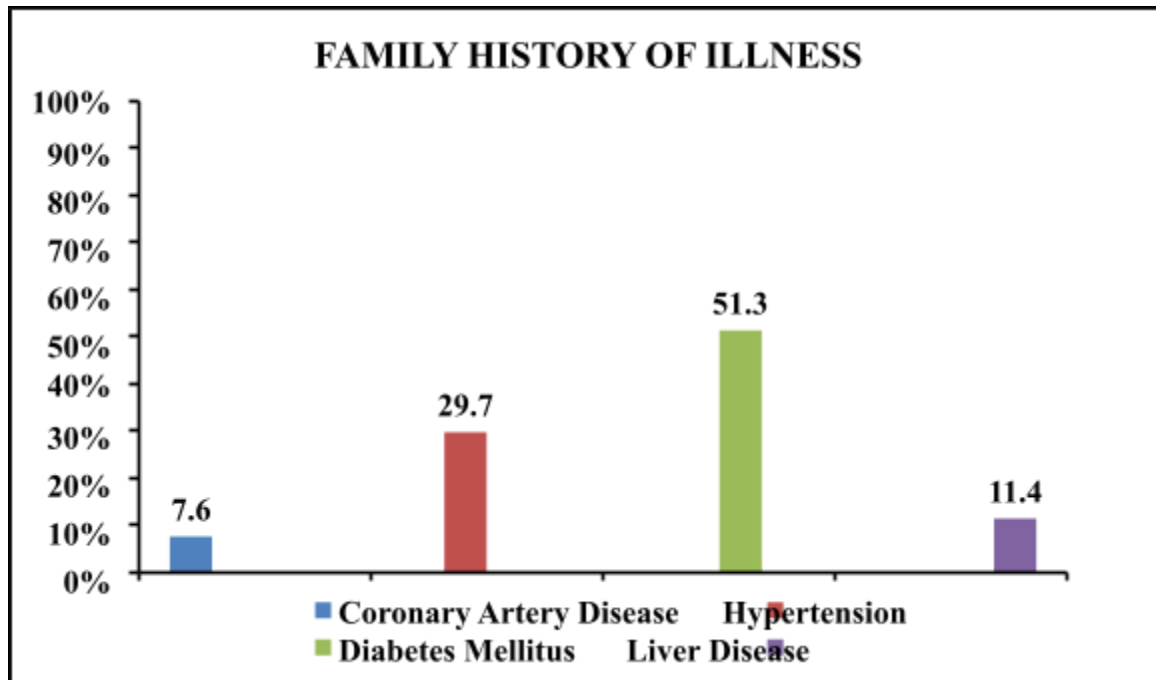

Fig 11: It represents percentage distribution based on history of family illness

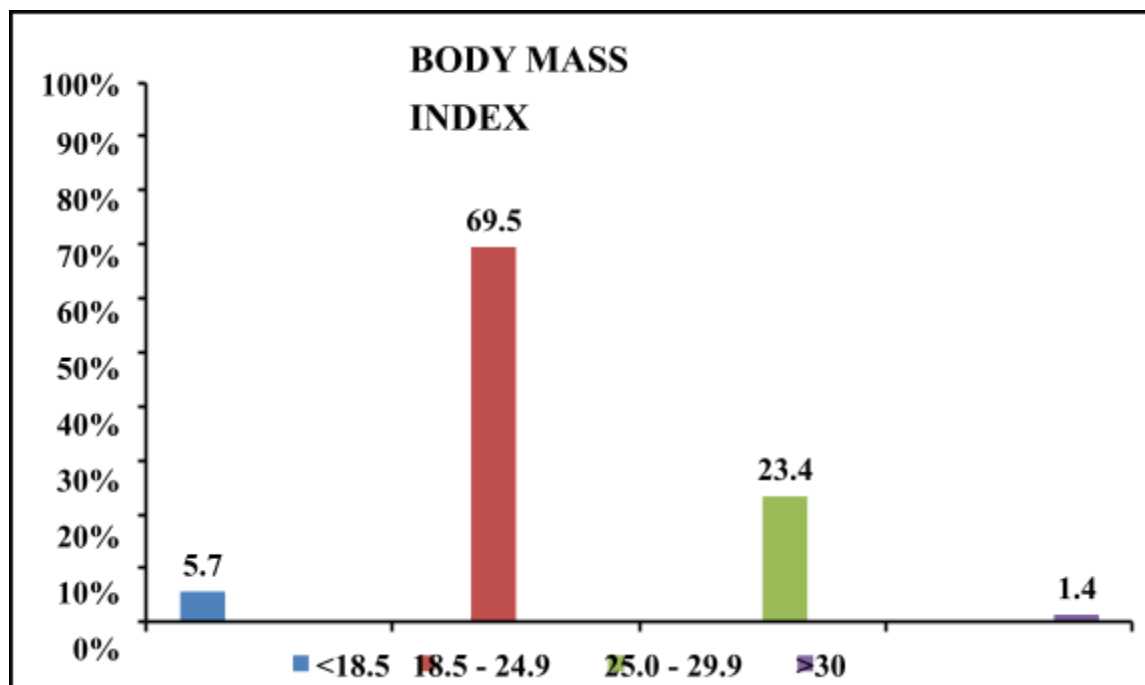

Fig 12: It illustrates percentage distribution based on body mass index of students
